MANHATTAN

They called it the capital of the world. And other dozens of epithets to describe it. We consider it is the most fascinating urban architecture in the world. This is Manhattan.

MANHATTAN COLLECTION
HERRINGBONE
#WP20349

This collection has been split in two different versions. One being made in the classic MINDTHEGAP style with IO designs printed on a premium non-woven coated wallpaper. The other one, called Metallic Edition, is a bit different than what we have produced before. We chose a new substrate and finishing for this collection that was made in England on a non-woven premium grade wallcovering. We imagined this special edition on a smooth satin surface and we have printed everything with metallic inks.
