GARDEN OF EDEN

This season Scion brings its fun-loving personality into the home with Garden of Eden, a playful collection of prints and wallpapers in a spectrum of fresh contemporary colour. A cheerful blend of Scandi design and Arts & Crafts influences combine in this uplifting collection, that's sure to bring a smile to the everyday.

A modern take on a traditional trend, Garden of Eden celebrates the honesty of craftsmanship, with its upbeat designs, hand drawn and hand painted in a free-spirited way.

Charlotte Gibson, lead designer for Scion says, "This hugely accessible collection has been a joy to work on – it combines Scion's fun, modern approach to design with a few subtle accents from the Arts & Crafts era. Garden of Eden's fabric and wallpapers are about appreciating the simple things in life, like nature and our surroundings, but of course we've sprinkled on a little bit of Scion magic, colouring and creating in our signature style." Make your home your own with Swim Swam Swan's flock of loved up birds, Garden of Eden's uninhibited design or Looting Fruit's charming hedgerow scene. Fab on trend colours like chai, Scion's new take on its popular ochre, team with vibrant pops of red, soft greys and the calmness of sage to create an exciting decorating scheme.
